NOTES

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

DATE _____

TEAM _____

DRILL / PLAY _____

A diagram of a rectangular frame. It consists of a central vertical axis with dots at the top and bottom. Two horizontal lines intersect this axis, one near the top and one near the bottom. These horizontal lines extend to the left and right edges of the frame. Additionally, there are vertical lines on the left and right sides of the frame, connecting the top and bottom horizontal lines. This creates a central rectangular area defined by the vertical axis and the two horizontal lines, with additional rectangular sections on the left and right sides.

The diagram shows a rectangular frame with a central vertical axis. The frame is composed of several horizontal and vertical lines. The central vertical axis has dots at its top and bottom ends. The frame is divided into four main vertical sections by three vertical lines. The top and bottom horizontal lines are continuous across all sections. The middle horizontal line is also continuous. The vertical lines are positioned at the left, right, and center. The central vertical line has dots at its top and bottom ends. The frame is divided into four main vertical sections by three vertical lines. The top and bottom horizontal lines are continuous across all sections. The middle horizontal line is also continuous. The vertical lines are positioned at the left, right, and center. The central vertical line has dots at its top and bottom ends.

The diagram shows a rectangular frame with a central vertical axis. The frame is divided into four vertical sections by three vertical lines. The top and bottom sections are wider than the middle two sections. A central vertical line passes through the middle of the frame, with small dots at the top and bottom. Horizontal lines are present at the top, bottom, and between the two middle sections. The entire structure is enclosed in a rectangular border.

DRILL / PLAY _____

A diagram of a rectangular frame with a central vertical axis and horizontal lines, resembling a stylized letter 'H' or a structural cross-section. The frame is composed of several rectangular sections. A central vertical line runs through the middle, with small dots at the top and bottom. Horizontal lines intersect this central axis, creating a grid-like structure. The overall shape is symmetrical about the central vertical axis.

NOTES

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

DATE _____

TEAM _____

DRILL / PLAY _____

A diagram of a rectangular frame. It consists of a central vertical axis with dots at the top and bottom. Two horizontal lines intersect this axis, one above and one below the center. These horizontal lines extend to the left and right edges of the frame. Additionally, there are vertical lines on the left and right sides of the frame, connecting the top and bottom horizontal lines. This creates a central rectangular area defined by the vertical axis and the two horizontal lines, with additional rectangular sections on the left and right sides.

DRILL / PLAY _____

A diagram of a rectangular frame with a central vertical axis and horizontal lines, resembling a stylized letter 'H' or a structural cross-section. The frame consists of a central vertical column and two horizontal bars, one at the top and one at the bottom. The vertical column is divided into three equal segments by two horizontal lines. The top and bottom horizontal bars are also divided into three equal segments by two vertical lines. The central vertical axis is marked with a dot at the top and a dot at the bottom. The entire structure is enclosed in a rectangular border.
